

Business Continuity Management System Policy of "AzInTelecom" LLC

"AzInTelecom" LLC ensures the safe and healthy work environment for the employees and contractors when organizing the services of international voice traffic exchange between Azerbaijan and foreign countries, certification of telecommunications imported to Azerbaijan and "Infrastructure as a Service (IaaS)" under the Data Center. Based on the ISO 22301 standard, "AzInTelecom" LLC undertakes the followings in regards to the Business Continuity Management System:

- ✓ Business impact analysis and risk assessment shall be applied to key services and priority activities, processes and resources that support them.
- ✓ Risk reduction strategies shall be applied to reduce the impact on the key services and company reputation.
- ✓ Plans shall be set up after breaks to ensure that the key services are restored to the minimum acceptable standards.
- ✓ Business continuity plans implementation can be managed.
- ✓ Compliance of our activity with the national and international standards, the requirements of the legislation of the Republic of Azerbaijan and regulatory legal acts, as well as identification and coordination of the effectiveness criteria for systematic improvement of the procedures shall be ensured.

**Deputy director,
Interim acting director**
